REFERENCES

Johnston R.J. & Sidaway J.D., eds., *Geography and geographers, Anglo-American human geography since 1945*, London, Arnold, 527 p.

- 1 This well-known book is in its sixth edition and focuses on Anglo-American geographers, with a historical/thematic point of view. Chapters are presented in the following order: 1. The nature of an academic discipline; 2. Foundations; 3. Growth of systematic studies and the adoption of 'scientific method'; 4. Human geography as spatial science; 5. Humanistic geography; 6. 'Radical geographies'; 7. Postmodern geographies; 8. Feminist geographies; 9. Applied geography and the relevance debate; 10. A changing discipline.
- 2 It contains an interesting bibliography and is also an excellent reference in Anglo-American epistemology.
